

YOUSEF ABDELHALEEM MOHAMED

UnderGraduate Computer Engineer

(+20) 01066756077 • yousef.abdelhaleem@gmail.com • LinkedIn: Yousef Haleem • Egypt, Cairo, Rehab City

Objective

To secure a challenging computer engineering internship position that will allow me to apply my technical skills and gain practical experience in the field

Education

German University in Cairo

Bachelor's Degree in Computer Engineering

2020 - Present

Courses & Certificates

Certificate from EGYFWD/UDACITY for completing challenger track for web development

Experience

German University in Cairo

Junior Teaching Assistant (Introduction to Computer engineering)

Cairo

2021 - 2022

Skills

JavaScript · Python · CSS · Wordpress · HTML · NodeJS · MongoDB · Express · JQuery · Prolog · Haskel · MySQL · Tool / Technology

Projects

Marvel Ultimate War Game

Cairo

2022

A 2d game created by using Java programming language and the interface by Swing, its a 2-player battle game where each player selects 3 champions to form a team and fight the other player's team on a 5x5 grid. Players take turns attacking each other's champions using normal or special attacks/abilities until one player defeats all of the other player's champions, winning the game. Obstacles/cover are also present on the grid, and each team starts on opposite sides of the grid at the beginning of the battle.

Travel Website

Cairo

2023

Made by using NodeJS, MongoDB, Express. Its a client/server network application by building a simple traveling website. Users can search for travel destinations, create an account, and add destinations to their "want-to-go list." The website should be hosted initially on the local host and later hosted on heroku.com.

Online Banking System

Cairo

2023

The UI/UX design was made by using HTML/CSS and JavaScript, Implemented all the user stories of the different stakeholders (Client, Admin, Banker) and designed the ERD, schema, class diagram for the whole system

Soccer League Management System

Cairo

2023

developed a soccer league management website using HTML/CSS and integrated it with an SQL server database. The primary objective of this project was to gain expertise in various aspects of SQL databases, including basic queries, as well as a wide range of functions and procedures.
